WORK EXPERIENCE

Software Developer, Upwork

Nov 2023 - Present

- As a proficient software developer on Upwork, I specialize in creating robust web applications using Python frameworks. With a strong focus on delivering high-quality, and efficient solutions, I have successfully completed numerous projects that meet clients' diverse needs.

Software Developer, WebTech-(Remote)

Aug 2023 - Present

- As a Python Developer at Webtech, I played a pivotal role in the development and maintenance of software solutions in alignment with the company's strategic objectives

Python Developer, Code Graphers-Lahore,Pakistan

Jun 2022 - Jun 2023

- As a Python Developer at Code Graphers, I played a crucial role in developing and maintaining software solutions aligned with the company's objectives. Over one year, I honed my skills and significantly contributed to various projects.

Software Developer, Falcon Moving-(Remote)

Jan 2020 - Dec 2021

- Since the start of 2020, I have been dedicated to developing automation scripts to streamline and optimize manual tasks for Falcon Moving. This role has allowed me to make significant contributions by leveraging my scripting skills to enhance operational efficiency and productivity.

Software Developer, Fiverr-(Freelance)

Jan 2020 - Present

- Since January 2020, I have been providing freelance Python and C# development services on Fiverr, catering to a diverse range of clients and projects. My experience on the platform has allowed me to develop a strong skill set and a reputation for delivering high-quality software solutions.

EDUCATION

Bachelor in Software Engineering
COMSATS University, Islamabad

Aug 2015 - Aug 2019

FSC
Punjab Group of Colleges

Sep 2019 - Oct 2020

PROJECTS

Hinix

- I am proud to present a great product which is a resource management website. This project is actually about managing resources for a startup company such as HR, CRM, and Project Management Systems. <http://hinix.us/>

ApexCare

- ApexCare is a project aimed at enhancing the living experience for elderly individuals. This initiative involves the creation and management of tickets, similar to Jira, to systematically address and resolve issues related to living spaces such as rooms and doors. By implementing a robust tracking system, I am ensuring efficient management and swift resolution of issues, ultimately contributing to the well-being and comfort of the elderly residents. This experience allows me to blend technical skills with a sense of purpose, emphasizing my commitment to impactful and solution-driven projects.

Toonvortex

- I am proud to present the manga collection website. This project is a testament to my expertise in web development, and design, and my passion for manga <https://toonvortex.art/>

Focusmore

- I leveraged the Flutter framework for the frontend and Django for the backend. This combination allowed for efficient development, and seamless integration, and ensured a responsive user interface. Hosted at <http://focusmore.fun/>

Object Sound Recognition

- During my university studies, I undertook a challenging project focused on object sound recognition. The goal was to develop a machine-learning model capable of identifying and classifying sounds associated with various objects and scenarios

Payroll system

- As a forward-thinking professional, I am actively involved in the conceptualization and construction of an innovative payroll system. Drawing upon my analytical acumen and expertise in programming languages such as [mention relevant languages], I am intricately crafting a solution that promises to revolutionize payroll processes. This hands-on experience allows me to enhance my skills in system architecture, database management, and creative problem-solving. By taking a proactive role in this project, I am not only showcasing my technical abilities but also demonstrating a commitment to driving efficiency and operational excellence within the organization.
